## PROFESSIONAL SUMMARY

Results-driven Data Analyst and AI Strategist with a background in Biochemistry and a track record of leveraging Python, SQL, and Power BI to derive actionable insights. Experienced in predictive modeling, data preprocessing, and educational leadership in AI. Proven ability to simplify complex data concepts and apply machine learning solutions to healthcare, e-commerce, and educational sectors.

## TECHNICAL SKILLS

- Programming: Python (Pandas, Scikit-learn, NumPy), SQL (MySQL)
- Data Visualization: Power BI, Matplotlib, Seaborn, Microsoft Excel
- Machine Learning: Predictive Modeling, Classification Models, Data Normalization
- Analytics: Statistical Analysis, Data Cleaning
- Tools: Jupyter Notebook, Git, Canva

## PROJECTS

### Sales Performance Dashboard

- Developed KPI dashboards in Power BI using Excel datasets.
- Used SQL queries for data extraction and reporting.
- Visualized monthly sales trends and customer performance metrics.

### Power Output Prediction

This project provide an API and a streamlit application for predicting power output (PE) based on environmental factors. The model uses Linear Regression from scikit-Learn, trained on features including:

- Ambient Temperature (AT)
- Exhaust Vacuum(V)
- Ambient Pressure (AP)
- Relative Humidity (RH)

The API is deployed using FastAPI, and a stream app provides an interactive interface for users to input values and get predictions.

## Hospital Emergency Room Dashboard

- Developed an interactive Hospital Emergency Room Dashboard in Power BI to analyze 9K+ patient records, track wait times, patient satisfaction, admission trends, and referral patterns.
- Delivered actionable insights by identifying peak patient traffic periods, monitoring ER performance metrics, and enabling data-driven resource allocation and operational efficiency improvements.

## WORK EXPERIENCE

### AI Educator | Mindthegap

*Jan 2025 – Jan 2026*

- Delivered training programs on Artificial Intelligence and data analysis for secondary school students.
- Simplified complex concepts like machine learning and automation into interactive, project-based lessons.
- Facilitated hands-on AI projects, improving students' problem-solving skills and digital literacy.
- Utilized storytelling and real-life examples to demonstrate AI applications in various industries.

## EDUCATION

### Bachelor of Science in Biochemistry

*2018 – 2024*

University of Uyo, Uyo, Nigeria

## CERTIFICATIONS

- Professional Foundations, ALX Nigeria
- Data Analytics Certificate, ALX Nigeria.
- Experience AI Certificate of Attendance, Raspberry Pi Foundation
- Machine Learning with Python, IBM Coursera
- Deep Learning Essentials with keras, IBM Coursera
